

Site Supervisor

Description

- * Supervise day-to-day execution of bridge foundations, piers, abutments, and superstructure works.
- * Monitor concreting, shuttering, reinforcement, piling, and other civil construction activities.
- * Ensure construction activities are carried out as per approved drawings, specifications, and project standards.
- * Coordinate with contractors, consultants, surveyors, laboratory teams, and other site personnel.
- * Verify site measurements, quantities, BOQ items, and work completed by contractors.
- * Monitor material usage, workmanship, quality standards, and construction progress.
- * Ensure compliance with site safety procedures and project quality requirements.
- * Review drawings and coordinate with the project team to resolve site-level technical issues.
- * Track daily work progress and prepare daily site reports and relevant documentation.
- * Monitor project schedules and support timely completion of assigned works.

Responsibilities

- * Perform any other duties and responsibilities assigned by the Management from time to time.
